Biomolecules in Cosmetic Sciences

Message from the Guest Editors

Cosmetics are defined as any substance or preparation intended to be used on the external parts of the human body that are mainly for cleansing, perfuming, beautifying, odorizing, and promoting well-being without affecting body structure or functions. A great deal of interest has been shown by consumers toward novel bioactive compounds as ingredients in cosmetics from natural resources because of their numerous beneficial effects compared to synthetic ingredients. The use of cosmetic preparations containing biomolecules aims to maintain the body in good condition, protect it from the effects of the environment and aging processes, change its appearance, and impart a good smell to the body.

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
