

Special Issue

Buildings Operation and Maintenance

Message from the Guest Editor

The O&M phase of buildings covers more than 50 years of their total life span and represents between 70% and 80% of their life cycle costs. Achieving smart building management with the objectives of ensuring continuity of services and activities, extending their service life and maintaining user satisfaction, is a complex issue in O&M and requires addressing many key topics, ranging from availability of O&M data to optimization of maintenance planning, and including diagnosis methods. In this Special Issue, we expect papers about O&M data: What are the key indicators to follow? How do we ensure data integrity? Studies can be proposed on measurements of O&M data, on the optimal placement of sensors, on data fusion, and on use of emergent sensors. We are also particularly interested in papers giving proof of value about the use of digital twins for building O&M.

Keywords:

- operation and maintenance
- monitoring
- sensors
- diagnosis
- data analytics
- prognosis
- optimization

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
