

Special Issue

New Challenges in Skin Cancer

Message from the Guest Editors

It is our pleasure to announce the launch of a new Special Issue for the Applied Sciences journal.

Skin cancer is the most common malignancy in humans, and its incidence steadily increasing in recent years regardless of race, posing a growing public health challenge.

In the Special Issue, we would like to publish original skin cancer research in the molecular pathophysiology field, which could lead to a better understanding of the mechanisms underlying the neoplastic process, with the translation of possible benefits in the therapeutical field of this disease.

Our hope is that the cognitive science community will find this Special Issue to be an informative and useful collection of articles. We invite submissions exploring cutting-edge research and recent advances in the fields of skin and mucosal cancer.

Keywords

- skin
- basal cell carcinoma
- squamous cell carcinoma
- melanoma

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
