

## Special Issue

# Advanced Technologies for Data Privacy and Security

### Message from the Guest Editors

The current COVID-19 pandemic situation highlights the fact that the protection of users' privacy and their digital identities is a crucial issue. Several new applications with possible impacts on users' privacy have been developed in the last few years to protect citizens and to reduce the risk of infection. Examples are contact tracing and COVID-19 certificate apps. Privacy-enhancing technologies (PETs) play a significant role in data protection. Thanks to PETs, anyone can access digital services anonymously, browse the Internet privately, process outsourced data without disclosing their context, and much more. On the other hand, using big data for digital services brings new challenges. The general goal of this Special Issue is to contribute to the expansion of knowledge in this field, to increase the protection of users' privacy, their digital identities, and their data in current use case scenarios.

### Guest Editors

Dr. Petr Dzurenda

Dr. Sara Ricci

Dr. Jordi Castellà-Roca

### Deadline for manuscript submissions

closed (10 September 2023)

## About the Journal

### Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering )
