

## Special Issue

# Current Techniques in Dental Implants: Biological and Technical Problems

### Message from the Guest Editors

We are delighted to invite you to submit a manuscript to the forthcoming Special Issue “Current Techniques in Dental Implants” in the Applied Science. This special issue will focus on this “burden disease,” including, but not limited to:

- etiopathogenesis of peri-implant diseases;
- influence of periodontitis on the incidence of peri-implantitis
- prevalence and incidence of peri-implant diseases
- biological and technical complications
- factors related to the dental implant that could influence the incidence of peri-implantitis
- phenotype of the peri-implant mucosa and its relationship with peri-implantitis
- treatment of peri-implantitis
- decontamination
- Systematic reviews and meta-analysis
- Microbiome and proteome
- Implant biofilm
- Implant surface topography treatment to avoid biofilm adhesion
- Laser therapy

## About the Journal

### Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.
