

## Special Issue

# Dependability and Security of IoT Network

### Message from the Guest Editors

Applied Sciences is currently running a Special Issue entitled "Dependability and Security of IoT Network". We are serving as the for this topic. I take great pleasure to have you informed that this issue is open for submission. Topics of interest include but are not limited to: - IoT's dependability and security modelling and evaluation; - IoT's dependability and security practice and solutions; - Quality of services (QoS) for IoT networks; - Fault-tolerant, disaster-tolerant IoT networks; - Dependable artificial intelligence for IoT networks; - Simulation and analytics of IoT networks; - Cloud/Fog/Edge continuum in IoT networks; - IoT networks: IoMT, IoIT, IoRT, IoVT, etc.; - IoT-based systems and networks for Unmanned Aerial Mobility (UAM); - IoT networks in Industry 4.0, Digital Twin and Metaverse. Detailed information can be found at: [https://www.special\\_issues/dependability\\_security\\_1oT](https://www.special_issues/dependability_security_1oT)

## About the Journal

### Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.
