

Special Issue

Machine Learning and Signal Processing for Diagnostics and Prognostics Applications

Message from the Guest Editor

Global industry competition is driving the maximization of the use of resources in terms of equipment, systems, and robots. Methodologies for modeling diagnostics and prognostics have played a crucial role in increasing reliability and durability of systems .

The increase in data availability using machine learning strategies and signal processing has permitted the use of computational methods to extract information from data modeling diagnostics and prognostics and prevent undesired performance. In this way, many challenges and opportunities remain to develop novel models and approaches transferring research results and new knowledge for different applications.

The purpose of this Special Issue is to gather high-quality research and contributions that address recent advances and developments in machine learning strategies and signal processing for diagnostics and prognostics applications, focusing on innovative systems, robots, mechatronic devices, and industrial processes.

Guest Editor

Dr. Francesco Aggogeri

Department of Mechanical and Industrial Engineering, University of Brescia, Via Branze, 38, 25123 Brescia, Italy

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
