

Special Issue

Drug Development for Cancer, Diabetes and Obesity

Message from the Guest Editor

Currently, cancer, diabetes, and obesity are a group of diseases considered as pandemics. Despite its importance, current pharmacological treatment has unreliable efficacy and is producing numerous undesirable secondary effects. Therefore, there is an urgent need to develop new therapeutic options. This Research Topic seeks manuscripts (original research, short communications, mini-review and review articles) dealing with novel approaches in the discovery and development of drugs for cancer, diabetes, and obesity. Areas to be covered in this Research Topic may include but are not limited to the following: * Bioactive compounds; * Computer-aided drug design; * Synthesis and biological activity of small molecules; * Drug targets; * Drug repositioning.

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
