

## Special Issue

# Elastographic Techniques in Diagnosing Endocrine Disease

### Message from the Guest Editors

In this Special Issue, we invite submissions exploring endocrine disease, targeting thyroid (including both nodular goiter and autoimmune disease) and parathyroid disease, also taking into consideration differential diagnosis with other surrounding tissues. Elastography has been repeatedly proven as a useful qualitative and quantitative tool that can offer a better differentiation of tissue elasticity, thus facilitating diagnosis and therapeutic management.

Contributions can focus on correctly recognizing disease, differential diagnostics and diagnostics of different types of endocrine disturbances. Survey papers and reviews are welcomed. Dr. Cotoi Laura Prof. Dr. Stoian Dana *Guest editors*

## About the Journal

### Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering )
