

Special Issue

Innovative Technologies Applied to Sustainable Solutions: Energy, Monitoring Systems and New Materials Production

Message from the Guest Editors

Foster innovation vision based on products, processes and solutions designed to leverage a reduction in the impacts of energy production; a digitalisation of the monitoring systems, the development of smart and eco-materials, is key to build a scientific body of knowledge that seeks to break the barriers of sustainable innovation. To reap the potential for this Special Issue on "*Innovative Technologies Applied to Sustainable Solutions: Energy, Monitoring Systems and New Materials Production*", we encourage researchers to submit critical reviews and original unpublished research articles which would provide the most recent insights and advances regarding the following topics (however not limited to):

- Sustainable energy systems
- Hydrogen generation and storage
- Real time monitoring
- Innovative smart systems
- New and advanced materials/nanomaterials
- Materials' life cycle analysis

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
