Special Issue

Environmental Nanomaterials: Source, Analysis and Application

Message from the Guest Editor

Nanomaterials can be used for water and air purification, wastewater treatment, inactivation of microorganisms, and conversion of fuel energy into electricity. Nanocomposites made of multiple nanomaterials usually have superior performance in pollutant removal. This Special Issue aims at presenting a compilation of papers that demonstrate the continuous research efforts in developing advanced and safe nanomaterial for environmental applications.

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32, 20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
