

Special Issue

Frontiers in Mechatronics Systems for Automotive

Message from the Guest Editors

In recent decades, new vehicles' design goals have proposed the use of lighter components and cost-effective, environmentally friendly systems. Diverse efforts have been devoted to reconciling the different design goals in vehicles at a system level. In this context, mechatronic solutions have enhanced the automobile in its different subsystems with smart chassis and powertrain devices. This trend has gained substantial momentum due to the electrification of the powertrain, which has enabled the inclusion of more electric components. More than ever, automotive technologies need to deliver simultaneously high performance and minimum energy consumption. This Special Issue aims to highlight trending systems in automotive mechatronics for chassis and powertrain, with a particular focus in energy efficiency.

Guest Editors

Dr. Angelo Bonfitto

Prof. Dr. Renato Galluzzi

Prof. Dr. Nicola Amati

Prof. Dr. Ricardo A. Ramirez-Mendoza

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
