

## Special Issue

# Geohazards: Risk Assessment, Mitigation and Prevention

### Message from the Guest Editors

This special issue aims to provide a common forum to share knowledge about the growing threat of Geohazards such as landslides and rock slides, earthquakes, floods, tsunamis, coastal erosion, drought among many others, due to the expanding size the cities and urban areas, critical use of agricultural lands, the increased use of infrastructure, and the effect of climate changes. Original work related to the topic is welcomed, along with side topics if demonstrated to have a direct application into the theme, such as field surveys, numerical modelling, statistical analysis, monitoring, vulnerability and risk assessment, mitigation and adaptation strategies. Dr. Ricardo Castedo

## About the Journal

### Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

---

### Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo  
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,  
20133 Milano, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, Embase, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering )
