

## Special Issue

# Novel Approaches for Exploring Geological Processes on Both Earth and Planetary

### Message from the Guest Editor

This Special Issue aims to provide reviews for innovative tools and technologies for exploring geomorphic/geological processes on the Earth and planetary surface (and even the shallow sub-surface). Research papers or case studies involving any discipline of geomorphic/geological processes are welcome.

## About the Journal

### Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering )
