Analyses in Geomatics: Processing Spatial Data on History and Today

Message from the Guest Editor

Modern technologies allow processing not only contemporary data, but older and historical (mainly) image materials also. There are many examples where historical materials have been used to reconstruct monuments destroyed by various influences, be it their degradation by time, wars, terrorism or natural destructive influences. Existing historical materials together with new data allow unprecedented and objective analysis of the state of objects, development of settlements, human activities and monitoring of changes in natural conditions or climate, etc. Status analysis using historical and new data is the main theme of this Special Issue.

Guest Editor

Prof. Dr. Karel Pavelka

Laboratory of Photogrammetry and Remote Sensing, Dept. of Geomatics, Faculty of Civil Engineering, Czech Technical University in Prague, 160 00 Prague 6 - Dejvice, Czech Republic

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
