New Advances in Hair Cosmetic Science

Message from the Guest Editors

Hair is an important component of body image with unquestionable relevance in society that we can easily change according to culture, fashion, and personal taste. Hair undergoes irreversible changes as a result of cosmetic operations and products as well as environmental assaults and daily routines. This causes the hair to lose some of its properties, such as strength, elasticity, shine, and smoothness. Recent research has proven the beneficial effects of natural-based cosmetic formulations on hair, as they can protect the hair fiber or modulate some of its properties. This Special Issues welcomes original works and reviews focused on the development of new classes of natural-based cosmetic formulations and how they affect hair attributes such as color, fragrance, strength, elasticity, shape, shine, and volume. We also welcome submissions on hair biology and on the modulation of the hair cycle. The incorporation of new formulations in the creation of alternative hair products in the future will result in innovative, sustainable, and environmentally friendly cosmetic goods that have a significant impact on the cosmetic sector.

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
