# Intelligent Processing on Image and Optical Information

### Message from the Guest Editor

- Intelligent image processing
- Machine and robot vision
- Optical information processing
- IR, THz, MMW, SAR image analysis
- Bio-medical image analysis
- Three-dimensional information processing
- Image detection, recognition, and tracking
- Segmentation and feature extraction
- Image registration and fusion
- Image enhancement and restoration

## About the Journal

### Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.
