# Special Issue

# Lower Limb Rehabilitation Robots

### Message from the Guest Editors

The scientific and medical community is becoming more and more interested in Rehabilitation Robotics. This special issue is structured around the most important scientific aspects of man-machine interaction. It is, particularly, focused on the lower limb rehabilitation. The topic, starting with passive devices that sustained the patient and forced him to perform gait exercises, is now strongly intertwined with biped robotics, and biometric signal processing. This special issue is addressed to experts and practitioners on control, robotics, signal processing, bioengineering, neuroscience, physiatry, and rehabilitation.

### Guest Editors

Dr. Eduardo Rocon

Prof. Dr. Giuseppe Menga

Dr. Alexandros Alexopoulos

### Deadline for manuscript submissions

closed (1 April 2022)

# About the Journal

### Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

### Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32, 20133 Milano, Italy

### Author Benefits

**Open Access:**
free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:**
indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:**
JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering )
