

Special Issue

Development of Mechanical, Electronic and Photonics Instrumentation for Civil Engineering

Message from the Guest Editor

The use of mechanical, electronic, and photonics instrumentations today represents an indispensable element in correctly addressing the scientific approach of the problems to be addressed. In the geophysical field, it was thus possible to know and appropriately define the territory especially in the presence of particular geomorphological aspects. In the field of geotechnical engineering, the use of modern on-site equipment, to be associated with laboratory equipment, has enabled problems such as the earthquake hazards, amplification phenomena, landsliding, soil liquefaction, zoning maps to be adequately addressed. In the field of structural engineering, it was possible to acquire knowledge relating to the quality of the construction materials used to evaluate their mechanical characteristics with the aim of being able to define a static and dynamic assessment of the behavior of civil engineering constructions and a planning of rehabilitation or seismic strengthening interventions.

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
