Metals Significance in Applied Sciences: From Biological Systems to Inorganic Materials

Message from the Guest Editors

In recent years, metals have received considerable attention from scientists in many fields, thanks to their important function in everyday life. Our aim is to open up to all fields in chemistry and materials science strongly connected with metals: from metallic polymers and high-tech devices to metals environmental monitoring and their discriminant value in statistical treatment, as well as to conservation science and cultural heritage.

In this Special Issue, we invite submissions exploring the study of metals in different research areas, such as medicinal, organic, and inorganic chemistry in a variety of applications. Contributions can focus on the involvement of metals in biological systems, on metals as catalysts, and on the study of metals in the environment and cultural heritage. Short communications and reviews are also welcomed.

Guest Editors

Dr. Luca Piemontese

Department of Pharmacy – Pharmaceutical Sciences, University of Bari Aldo Moro, Bari, Italy

Dr. Lorena Carla Giannossa

Department of Chemistry, University of Bari Aldo Moro, Bari, Italy

Deadline for manuscript submissions

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (Fluid Flow and Transfer Processes)
