

## Special Issue

# Nanomaterials and Tissue Engineering

### Message from the Guest Editors

This Special Issue focuses on three main topics: (i) fabrication of nanomaterials for tissue engineering application; (ii) nanomaterial applications in soft tissue engineering, including cardiac, neural, and cartilage tissue engineering; and (iii) nanomaterial applications in hard tissue engineering, including bone, dental, and craniofacial tissue engineering. Contributions dealing with biopolymers such as polysaccharides and proteins are encouraged. Best wishes

## About the Journal

### Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.
