

## Special Issue

# New Insights into Collaborative Robotics

### Message from the Guest Editor

Collaborative robotics are capable of collaborating and interacting with humans. They increase efficiency and productivity, as well as break new ground in manufacturing and related fields. After continuous design and optimization, collaborative robotics have been widely used in production and life. This Special Issue is dedicated to collecting manuscripts related to collaborative robotics, exploring new technologies and insights in the field.

## About the Journal

### Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering )
