

Special Issue

Natural-Hazards Risk Assessment for Disaster Mitigation

Message from the Guest Editors

This Special Issue of Applied Sciences addresses concepts, methods, and techniques for the natural hazards risk assessment including, but not limited to, floods, earthquakes and meteotsunamis. Topics of interest include:

- Quantitative, semi-quantitative, and qualitative methods for the assessment of risk related to natural hazards;
- Risk analysis at different scales;
- Multi-hazard risk assessment techniques;
- Real-time hazard monitoring and warning systems;
- Disaster mitigation strategies;
- Risk management and emergency planning at multiple scales

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.
