

Special Issue

Nondestructive Testing (NDT): Volume II

Message from the Guest Editor

Following the great success of the Special Issue “Nondestructive Testing (NDT)”, which was closed in February 2020, we have decided to launch a second edition, which will hopefully be as successful and provide as much insight as the first. The efficient maintenance of civil structures and infrastructures is becoming a major issue for public and private institutions due to the unavoidable aging and deterioration of materials. As a matter of fact, the structural conditions of built heritage affect both safety and economic aspects. Therefore, the aim of this new Special Issue is to reunite researchers working in the field of NDT-SHM, both at the material and structure scale. We expect this issue to provide novel insights on the application of NDT to a wide variety of materials (concrete, steel, masonry, composites, etc.) in the field of Civil Engineering and Architecture. Both experimental and numerical studies are welcome.

Guest Editor

Dr. Giuseppe Lacidogna

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
