Novel Approaches for Sewage Treatment

Message from the Guest Editor

For centuries, water has been used and wasted without restraint. Industry, agriculture, and human life consume huge amounts of water. At present, thousands of tons of industrial and domestic sewage are released in environment. The complexity of sewage presents an enormous challenge for remediation, with the increasing loading of priority pollutants emerging from a variety of waste streams. It is important and necessary to develop efficient and safe wastewater treatment technologies, such as photocatalytic oxidation and reduction technology. We invite papers to this Special Issue of *Applied Science* pertaining to the following: research on advanced methods of sewage treatment, methods to meet the complexity of emerging wastewater contaminants.

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
