# Special Issue

# Numerical Methods in Lighting

## Message from the Guest Editors

The journal *Applied Sciences* (ISSN 2076-3417, IF 2.679) is running a Special Issue entitled "Numerical Methods in Lighting". and are serving as for this issue. This Special Issue will present research related to numerical methods used in lighting and lighting system design. The emphasis is on the methods, projection techniques and metrics associated with lighting, human behavior related to lighting, and relevant associated infrastructure. Specific topics are listed below. Submitted papers should not be under consideration for publication elsewhere. TOPICS:

- Modeling of artificial lighting
- Modeling of daylight
- Lighting and electromagnetic compatibility
- Visualization techniques in lighting
- Projections and modeling of depreciation methods
- Modeling of glare
- Modeling of lighting for green buildings
- Integrating human behavior metrics in lighting design
- Wireless communications and lighting

## Guest Editors

Dr. Dariusz Kacprzak

Department of Electrical, Computer Engineering and Software Engineering, the University of Auckland, Auckland 1010, New Zealand

Dr. Michael Neve

Department of Electrical, Computer Engineering and Software Engineering, the University of Auckland, Auckland 1010, New Zealand

## Deadline for manuscript submissions

closed (28 February 2022)

# About the Journal

### Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

### Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32, 20133 Milano, Italy

### Author Benefits

**Open Access:**
free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:**
indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:**
JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering )
