

Special Issue

Currents Concepts and Challenges in Oral Health: Implications for the Global Population

Message from the Guest Editors

The current Special Issue invites original research papers and reviews dealing with the recent concepts in oral health and disease. Research papers focusing on large population-based epidemiological studies of oral diseases, and prognostic and diagnostic markers used in the early detection of chronic oral diseases are of interest. The scope of the Issue includes recent advancements in the diagnosis of oral and maxillofacial diseases using biosensors, advanced imaging modalities, and AI-enhanced modalities. Articles studying the impact of oral diseases on systemic health, mental health, and quality of life are also encouraged.

- oral epidemiology
- oral premalignancy and malignancy
- oral manifestation
- prognostic and diagnostic markers
- biosensors
- oral and maxillofacial diagnostic imaging
- periodontitis
- quality of life
- artificial intelligence

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
