

Special Issue

New Insights in Power System Operations and Planning

Message from the Guest Editors

It is my pleasure to introduce a Special Issue of *Applied Science* on “New Insights in Power System Operation and Planning”, and to invite interested authors to submit original contributions on the related topics. The COVID-19 crisis has underscored electricity’s vital role in modern societies. Reliable electricity ensures the smooth functioning of hospitals and enables many people living under lockdown to continue to work, study, shop, and socialize from home. At the same time, electricity is critical for successfully achieving transitions to clean energy. Contributions for this Special Issues are expected to address the most advanced topics referring to today’s power system operation and control, and emergent planning strategies. The main topics of interest for this Special Issue include, but are not limited to:

- Effects of uncertainty on power system operations;
- Effect of large-scale integration of distributed resources on the short circuit capacity in transmission systems;
- Mitigation of oscillations in transmission networks by using storage and demand.

Guest Editors

Prof. Dr. Jun Yang

School of Electrical Engineering and Automation, Wuhan University, Wuhan, China

Dr. Ghamgeen Rashed Izat

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
