

Special Issue

Structural Reliability of RC Frame Buildings

Message from the Guest Editor

The aim of this Special Issue is to attract world-leading researchers in the area of reliability assessment of RC frame buildings in an effort to highlight the effects of aging, ordinary and exceptional loads, thread-independent damage scenarios or other phenomena that can occur during the working life of the constructions such as, but not limited to, maintenance and repair works. The accepted contributions will focus on structural reliability and will include theoretical considerations, numerical and experimental modeling, and applications to specific and well-detailed case studies. Keywords:

- Frame structures
- Reinforced concrete
- Reliability
- Damage scenario
- Maintenance works

Guest Editor

Dr. Valerio De Biagi

Department of Structural, Geotechnical and Building Engineering (DISEG), Politecnico di Torino, Corso Duca degli Abruzzi 24, 10129 Torino, Italy

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
