

Special Issue

Communication System in Smart Grids

Message from the Guest Editor

The electric power grid is evolving into a distributed, user-centric smart grid capable of providing economically efficient, sustainable power with high reliability, security, and safety. Realizing the vision of the smart grid requires reliable and effective information and communication technologies that enable high-speed, low-latency communications. Indeed, communication technologies are a key enabler for many of the foreseen smart grid features, such as demand response, advanced metering infrastructure (AMI), electric vehicle and storage unity integration, and microgrid control. Several solutions for smart grid communications have recently emerged that rely on new generation wireless communication and power line communication technologies. This includes novel approaches to enable smart meters and other machine-type devices to communicate with the grid, as well as new communication solutions to enable vehicle-to-grid and grid-to-vehicle communications. The integration of information and communication technologies in the grid also poses security risks that must be mitigated from a cyber-physical perspective.

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
