

Special Issue

Trend and Innovations in Surface Treatments for Aluminum Alloys

Message from the Guest Editor

Surface treatments have been traditionally applied to aluminum alloys in order to prevent corrosion phenomena, for decorative purposes, or prior to bonding or welding. The aim of this Special Issue of *Applied Sciences* is to gather original research articles which focus on recent progresses and developments in the discipline of surface treatments for aluminum alloys, both in basic science and the technologies used in the industry. All related topics are welcome, including, but not limited to, pretreatments, mechanical, chemical, electrochemical or laser treatments, paints, finishes, characterization techniques and repair processes. For further reading, please visit the [Special Issue website](#).

Guest Editor

Dr. Leandro González Rovira

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (Fluid Flow and Transfer Processes)
