Special Issue

Advances in Ventilation and Energy Saving for Healthy Indoor Ambiences

Message from the Guest Editor

From the beginning, the term "indoor air" has been a research area with two main handicaps—to control the quality of the indoor environment and to improve the ambiance through thermal comfort conditions with a lower energy consumption. In this sense, because of the reduced dimensions of indoor ambience and the different emission sources placed indoors, a better solution to ensure these objectives is to ventilate and renovate indoor ambience with clear outdoor air. With the aim to inspire future research activities and ventilation standards, this special issue is making a call to researchers to agglutinate different ventilation solutions in order to define new air cleaning technologies or, in general, to define or improve knowledge about indoor air ventilation. About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo

Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32, 20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
