

Special Issue

Treatment of Wastes and Energy Recovery

Message from the Guest Editor

In recent years, the rapid population growth and industrialization have increased the use of natural resources and production of wastes. Intense pollution of the environment has led to the development and application of many biological as well as physicochemical technologies for wastewater treatment and waste management. Moreover, the increased care for environmental protection and strict legislation, as well as circular economy implementation, has led to the consideration of novel treatment technologies, recycling and reuse alternatives, and disposal control strategies for wastewater and waste. The application of mathematical models capable of describing the processes considered in treatment/management schemes comprise effective tools for the prediction and design of full-scale applications for wastewater and waste treatment. On the basis of the above, we believe that this Special Issue will successfully report recent advances and research findings regarding novel technologies for wastewater treatment and waste management toward environmental de-pollution and, eventually, human health protection.

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
