

Special Issue

New Trends in Weed Control and Smart Agriculture

Message from the Guest Editors

Farming systems are increasingly moving towards sustainable management practices with the aim to reduce chemical inputs. Weed control is probably the major issue in organic agriculture as chemical herbicides are completely forbidden. Farmers have to find effective alternatives to avoid unacceptable losses. On the other hand, reducing the use of herbicides is a also important task. Smart agriculture technologies can help the farmers to achieve the goal of more sustainable crop management thanks to the development of “intelligent” machines. Furthermore, the integration between preventive, cultural, plant-based weed control methods and precision agricultural techniques is another outstanding issue in this field. In this Special Issue, all contributions covering the following topics are welcome:

- innovative strategies and machines for weed control
- precision agriculture
- organic agriculture
- integrated agriculture
- low rate sprayers
- autonomous machines for weed control
- autonomous machines for groundcover and cover crop management
- herbicides reduction
- sensors and software for weed-crop/weed-row discrimination

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
