Contemporary Issues in Participatory Architecture

Message from the Guest Editors

Dear colleague,

This Special Issue intends to shed light on recent innovation (research-driven or practice-driven) in Participatory Architecture. What are the contemporary issues in that regard? Are there any recently adapted, renewed tools, methods, environments and models of interaction and participation that have been developed and specifically tailored for the architectural field? How could theoretical, empirical, experimental initiatives (either from the architectural field or from any other discipline) help us to root participatory architecture into practice? Any research paper with strong theoretical, empirical, or experimental findings, prone to helping the architectural field to bridge the gap toward users' active involvement is welcome, regardless of its epistemological or disciplinary position.

About the Journal

Message from the Editor-in-Chief

The journal Architecture is an outstanding platform for new ideas and for reporting the outcomes of your research. The subjects sought are wide ranging and include design strategies, form, and technology. The need to be innovative in a rapidly changing profession and building environment make this journal the ideal place to publish. We are open to creativity and out-of-the-box thinking.

Editor-in-Chief
