Adaptive Architectural Practice: Data, Materials, and Labour in a Changing Climate

Message from the Guest Editor

This Special Issue on “Adaptive Architectural Practice: Data, Materials, and Labour in a Changing Climate” invites contributions that reflect on how architectural practice is evolving in response to urgent and complex challenges. We are particularly interested in papers that examine how climate change, fluctuating material availability, and shifting construction labour markets are reshaping design processes and outcomes. This Special Issue also seeks to highlight the increasing role of data-driven design methodologies, digital tools, and integrated workflows in contemporary practice. By bringing together diverse international perspectives, this Special Issue aims to capture the dynamic and responsive nature of architectural practice today—one that is continuously adapting to external forces while remaining committed to creativity, quality, and social responsibility.

About the Journal

Message from the Editor-in-Chief

The journal Architecture is an outstanding platform for new ideas and for reporting the outcomes of your research. The subjects sought are wide ranging and include design strategies, form, and technology. The need to be innovative in a rapidly changing profession and building environment make this journal the ideal place to publish. We are open to creativity and out-of-the-box thinking.
