Strategies for Architectural Conservation and Adaptive Reuse

Message from the Guest Editor

With the emergence of community-led approaches and tools for the interpretation and valuation of cultural heritage (critical heritage, cultural mapping, etc.), adaptive reuse strategies have been diversified, using design and conservation as tools to regenerate historic and heritage places while promoting their tangible and intangible heritage dimensions. Thus, this Special Issue aims to serve as a platform to assemble such recent and innovative research findings and draw attention to different approaches relating to the field of adaptive reuse and architectural conservation. Through an open access mode, this Special Issue intends to disseminate this knowledge widely at a time when the heritage context is facing critical challenges posed by urbanisation and the need for economic development. The discussion in this Special Issue intends to cover diverse types of historic and modern heritage.

About the Journal

Message from the Editor-in-Chief

The journal Architecture is an outstanding platform for new ideas and for reporting the outcomes of your research. The subjects sought are wide ranging and include design strategies, form, and technology. The need to be innovative in a rapidly changing profession and building environment make this journal the ideal place to publish. We are open to creativity and out-of-the-box thinking.
