Infectious Diseases in Respiratory Medicine

Message from the Guest Editor

We are pleased to invite you to contribute to this Special Issue, "Infectious Diseases in Respiratory Medicine". Infectious diseases continue to represent a major cause of morbidity and mortality worldwide, with respiratory infections ranking among the most common and severe. The recent global experience with COVID-19 has highlighted the critical need for continued research into the diagnosis, treatment, and prevention of respiratory infections. Beyond emerging viral pandemics, bacterial, fungal, and mycobacterial respiratory infections remain highly prevalent, with substantial impact on healthcare systems, patient quality of life, and long-term outcomes. Advancing our understanding in this field is therefore essential for improving patient care and public health. This Special Issue aims to bring together cutting-edge research and expert perspectives on infectious diseases affecting the respiratory system. It will cover diverse aspects of pathogenesis, diagnostics, therapeutics, and prevention strategies. We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Adam Barczyk
Department of Pneumology, School of Medicine in Katowice, Medical
University of Silesia in Katowice, Katowice, Poland

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid
by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), PubMed,
MEDLINE, PMC, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 23.3 days after
submission; acceptance to publication is undertaken in 4.5
days (median values for papers published in this journal in
the first half of 2025).
