Andalusi Architecture: Shapes, Meaning and Influences

Message from the Guest Editor

The importance of Andalusi art in its developmental stage, and in the evolution of Hispanic architecture, seems to be undeniable. At present, a large group of monuments and archaeological remains continue to remind us about that great period of history in the Iberian Peninsula (from the eighth to the fifteenth century). Fortunately, during the first half of the 20th century, some great historians and archaeologists, such as Leopoldo Torres Balbás, Henri Terrasse, or Manuel Gómez-Moreno, emphasized the importance of this period. Since then, many successful publications have enriched the historiographical scene and have completed some aspects that previously remained unknown. In this sense, this Special Issue will deal with the current context of this topic, and the idea of the main researchers making that context public for the scientific community. Through their contributions, a current perspective about Andalusi architecture will be presented. In conclusion, we aim to highlight the shapes of Andalusi architecture in its original context and today.

About the Journal

Message from the Editor-in-Chief

Arts welcomes scholarly contributions that address fundamental issues in the arts, broadly conceived, from any meaningful perspective—theoretical, historical, interdisciplinary, and global. Submissions are expeditiously and rigorously reviewed by peers, in order to insure the highest scholarly standards. Because *Arts* is an online journal, articles reach their desired audiences more quickly and reliably than its print media peers. The future is digital, and *Arts* combines the stringent scholarly standards of traditional journals with the easy accessibility afforded by digitalization.
