

## Special Issue

# Virtual Reality in Product Design

### Message from the Guest Editors

The interconnection between product design and user satisfaction has become an emerging topic for researchers working in the field of product lifecycle management (PLM) in the last decade. The involvement of the potential customer in an early phase of the product design allows gaining a user's feedback in advance. Thus, user-centered design methods have been recently adopted together with interaction design techniques thanks to the adoption of virtual reality (virtual prototype). The interaction between the user and a virtual product during the design phase is a key factor to gain a final product which responds to the inner needs of the clientele; emotional design is indeed the tail end of the topic.

## About the Journal

### Message from the Editor-in-Chief

---

#### Editor-in-Chief

Prof. Dr. Christos Douligeris  
Department of Informatics, University of Piraeus, 18534 Piraeus,  
Greece

---

#### Author Benefits

##### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

##### High Visibility:

indexed within Scopus, ESCI (Web of Science), Inspec, Ei Compendex and other databases.

##### Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /  
CiteScore - Q1 (Applied Mathematics)
