Air Quality in Romania

Guest Editors:

Dr. Doina Nicolae

National Institute of Research and Development for Optoelectronics INOE, Magurele, Romania

Dr. Anca Nemuc

National Institute of Research and Development for Optoelectronics INOE, Magurele, Romania

Deadline for manuscript submissions: closed (30 September 2020)

Message from the Guest Editors

This Special Issue aims to present recent results in the observation and modeling of the air quality in Romania, the atmosphere of which is subjected to emissions of several types of potentially hazardous air pollutants: urban-industrial, wildfires, local (agricultural) biomassburning, and mineral dust aerosols. We invite researchers to present atmospheric research results based on in situ experimental observations, use of satellite retrievals, passive and active remote sensing observations, and application of chemical transport and/or development of statistical models for forecasting air pollution levels and assisting the monitoring and mapping of air pollution. We also invite researchers to contribute with original research articles dealing with activities used to validate products from atmospheric observations, studies on long-term trends in ambient air pollutants and atmospheric deposition, emissions. and emission sources. transboundary, long-range, and regional-range transport of air pollutants.

Prof. Dr. Ilias Kavouras

Environmental, Occupational, and Geospatial Health Sciences, CUNY School of Public Health, New York, NY 10027, USA

Message from the Editor-in-Chief

Continued developments in instrumentation and modeling have driven atmospheric science to become increasingly more complex with a deeper understanding of concepts, mechanisms, and interactions. This is the field that innovation built and it has led to a better appreciation for the complexity with atmosphere. Human life is intertwined in this complexity as we strive to better understand our atmosphere. Climate change is constantly stretching the limits of our thinking and forcing new ideas and concepts to be played out. Welcome to the Anthropocene!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, Inspec, CAPlus / SciFinder, Astrophysics Data System, and other databases. **Journal Rank:** CiteScore - Q2 (*Environmental Science (miscellaneous)*)
