Message from the Guest Editors

Dear Colleagues,

The aim of this Special Issue is to describe the recent advances made in the field of emission inventory, air quality modeling, environmental health risks, and carbon emissions. Emission inventory and air quality models play an important role in assessing air pollution and formulating control policies. Emission inventories include, but are not limited to, anthropogenic emission inventories, carbon emission inventories, urban emission inventories, and industry emission inventories. The latest applications of satellite data and emission inventories are also involved and considered. Air quality models are used for forecasting purposes and include mainstream models such as CALPUFF, CMAQ, and CAMx.

Topics of interest for this Special Issue include but are not limited to:

- Emission inventories (anthropogenic emission inventory, carbon emission inventory, urban emission inventory, and industry emission inventory);
- Air quality models (CALPUFF, CMAQ, CAMx, etc.);
- The applications of satellite data and emission inventories;
- Environmental health risks.

Message from the Editor-in-Chief

Continued developments in instrumentation and modeling have driven atmospheric science to become increasingly more complex with a deeper understanding of concepts, mechanisms, and interactions. This is the field that innovation built and it has led to a better appreciation for the complexity with atmosphere. Human life is intertwined in this complexity as we strive to better understand our atmosphere. Climate change is constantly stretching the limits of our thinking and forcing new ideas and concepts to be played out. Welcome to the Anthropocene!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, Inspec, CAPlus / SciFinder, Astrophysics Data System, and other databases.
Journal Rank: CiteScore - Q2 (Environmental Science (miscellaneous))
