

Special Issue

Climate Change and Extreme Weather Disaster Risks

Message from the Guest Editors

We are pleased to announce that a Special Issue on Climate Change and Extreme Weather Disaster Risks will be hosted by the open-access journal *Atmosphere* and published in the fall of 2024. The goal of establishing this Special Issue is to broaden the understanding of extreme climate disaster risks that result from climate change, reduce subsequent losses from extreme weather events, and forecast future changes in extreme climate disaster risks. In this Special Issue, original research, systematic reviews, and model studies related to the themes of climate change and extreme disaster risks are welcome. Example topics include, but are not limited to, the following:

- The global/regional assessment of extreme disaster risks;
- The characterization and attribution of extreme disaster changes;
- The early warning and management of extreme disasters;
- The analysis of compound extreme disaster co-occurrence risks.

Guest Editors

Dr. Jie Zhang

Dr. Wenli Lai

Dr. Pengtao Wang

About the Journal

Message from the Editor-in-Chief

Continued developments in instrumentation and modeling have driven atmospheric science to become increasingly more complex with a deeper understanding of concepts, mechanisms, and interactions. This is the field that innovation built and it has led to a better appreciation for the complexity with atmosphere. Human life is intertwined in this complexity as we strive to better understand our atmosphere. Climate change is constantly stretching the limits of our thinking and forcing new ideas and concepts to be played out. Welcome to the Anthropocene!

Editor-in-Chief

Dr. Daniele Contini

Institute of Atmospheric Sciences and Climate (ISAC), National Research Council (CNR), Str. Prv. Lecce-Monteroni km 1.2, 73100 Lecce, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, Inspec, CAPlus / SciFinder, Astrophysics Data System, and other databases.

Journal Rank:

CiteScore - Q2 (Environmental Science (miscellaneous))
