

Special Issue

Future Prospects for Air Quality Management in the 21st Century

Message from the Guest Editor

This Special Issue will contribute to addressing air-quality management in the future, considering the existing state of the art. Its main objective is to analyze the influence of the interactions between different factors providing science-based knowledge, new approaches and solutions in air-quality management.

Papers providing a literature review that addresses the quantitative emissions and air-quality forecasts from a variety of sources, and how they are managed by decision-makers, are welcome. It is encouraged to suggest alternative views and to identify potential issues that have not been highlighted here. Management planning, resilience assessment, and case studies based on multidisciplinary works will also be accepted.

Guest Editor

Prof. Dr. Salah Khardi

Research Director, Member of the University of Lyon Research Ethics Committee, Transport and Air Pollution-Technological Innovations, Gustave Eiffel University, Campus of Lyon, Lyon, France

About the Journal

Message from the Editor-in-Chief

Continued developments in instrumentation and modeling have driven atmospheric science to become increasingly more complex with a deeper understanding of concepts, mechanisms, and interactions. This is the field that innovation built and it has led to a better appreciation for the complexity with atmosphere. Human life is intertwined in this complexity as we strive to better understand our atmosphere. Climate change is constantly stretching the limits of our thinking and forcing new ideas and concepts to be played out. Welcome to the Anthropocene!

Editor-in-Chief

Dr. Daniele Contini

Institute of Atmospheric Sciences and Climate (ISAC), National Research Council (CNR), Str. Prv. Lecce-Monteroni km 1.2, 73100 Lecce, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, Inspec, CAPlus / SciFinder, Astrophysics Data System, and other databases.

Journal Rank:

CiteScore - Q2 (Environmental Science (miscellaneous))
