

## Special Issue

# Enhancing Indoor Air Quality: Monitoring, Analysis and Assessment

### Message from the Guest Editors

Understanding and addressing indoor air quality is vital for our well-being. The air we breathe in indoor atmospheres can significantly impact our health, comfort, and productivity. This Special Issue aims to spotlight advancements in understanding and improving indoor air quality (IAQ). It focuses on research that delves into the multifaceted aspects of IAQ in different indoor settings, encompassing factors such as pollutant diversity and concentration, ventilation systems, building materials, occupant behaviors, and their collective impact on health and comfort. This Special Issue aims to spotlight advancements in understanding and improving indoor air quality (IAQ). ## About the Journal

### Message from the Editor-in-Chief

Continued developments in instrumentation and modeling have driven atmospheric science to become increasingly more complex with a deeper understanding of concepts, mechanisms, and interactions. This is the field that innovation built and it has led to a better appreciation for the complexity with atmosphere. Human life is intertwined in this complexity as we strive to better understand our atmosphere. Climate change is constantly stretching the limits of our thinking and forcing new ideas and concepts to be played out. Welcome to the Anthropocene!

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, Inspec, CAPlus / SciFinder, Astrophysics Data System, and other databases.

#### Journal Rank:

CiteScore - Q2 (Environmental Science (miscellaneous))
