

## Special Issue

# Indoor Air Quality and Health: Emerging Pollutants, Sources, and Impact

### Message from the Guest Editor

I am pleased to announce the Special Issue “Indoor Air Quality and Health: Emerging Pollutants, Sources, and Impact” that targets research papers with a topic related to indoor air quality and exposure to indoor pollutants that have direct implications to human health. The topic deals with investigation and identification of exposure conditions and the relevant sources that may pose an adverse outcome in human health. Research papers that focus on indoor activities—such as cooking, vacuuming, ironing, or the use of perfume and cosmetic products—will be considered for publication. Identification of pollutants like chemicals, particles and gases that are primarily emitted within the indoor environment along with investigation of their dynamics, interactions with other indoor pollutants or secondary formation are welcome. The topic also focuses on exposure conditions of everyday life activities and has direct connection with health effects that may be attributed from exposure to indoor pollutants.

## About the Journal

### Message from the Editor-in-Chief

Continued developments in instrumentation and modeling have driven atmospheric science to become increasingly more complex with a deeper understanding of concepts, mechanisms, and interactions. This is the field that innovation built and it has led to a better appreciation for the complexity with atmosphere. Human life is intertwined in this complexity as we strive to better understand our atmosphere. Climate change is constantly stretching the limits of our thinking and forcing new ideas and concepts to be played out. Welcome to the Anthropocene!

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, Inspec, CAPlus / SciFinder, Astrophysics Data System, and other databases.

#### Journal Rank:

CiteScore - Q2 (Environmental Science (miscellaneous))
