

Special Issue

Catalytic Technology for Volatile Organic Compound Removal

Message from the Guest Editor

This Special Issue stands as a testament to the collective wisdom of numerous global scientific elites and industry experts who have dedicated their efforts to thoroughly analyzing the latest technological advancements and groundbreaking research achievements in the field of VOC catalytic purification. This comprehensive exploration delves into multiple facets of this field, encompassing catalyst study, process reinforcement, and catalytic mechanisms. This collection of research aims to ignite a spark of inspiration within the minds of researchers, engineers, and industry professionals, fostering collaboration and driving innovation in the quest to address the pressing challenges posed by VOC pollution. I am confident that this Special Issue will offer invaluable insights and perspectives to enrich your understanding.

About the Journal

Message from the Editor-in-Chief

Continued developments in instrumentation and modeling have driven atmospheric science to become increasingly more complex with a deeper understanding of concepts, mechanisms, and interactions. This is the field that innovation built and it has led to a better appreciation for the complexity with atmosphere. Human life is intertwined in this complexity as we strive to better understand our atmosphere. Climate change is constantly stretching the limits of our thinking and forcing new ideas and concepts to be played out. Welcome to the Anthropocene!

Editor-in-Chief

Dr. Daniele Contini

Institute of Atmospheric Sciences and Climate (ISAC), National Research Council (CNR), Str. Prv. Lecce-Monteroni km 1.2, 73100 Lecce, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, Inspec, CAPlus / SciFinder, Astrophysics Data System, and other databases.

Journal Rank:

CiteScore - Q2 (Environmental Science (miscellaneous))
