

## Special Issue

# Atmospheric Composition and Regional Climate Studies in Bulgaria

### Message from the Guest Editors

The Special Issue aims to promote atmospheric studies in Bulgaria in particular in the fields of atmospheric composition and climatic research. Papers are welcomed on air quality, the impact of air quality on environment and human health, the origin of the air pollution and the processes that form it, current and future regional climates for different global climate change scenarios, regional climate impacts on the environment and quality of life, computer simulation validation and sensitivity studies, interactions of different scales, and evaluation the effect of resolution on the simulated results.

## About the Journal

### Message from the Editor-in-Chief

Continued developments in instrumentation and modeling have driven atmospheric science to become increasingly more complex with a deeper understanding of concepts, mechanisms, and interactions. This is the field that innovation built and it has led to a better appreciation for the complexity with atmosphere. Human life is intertwined in this complexity as we strive to better understand our atmosphere. Climate change is constantly stretching the limits of our thinking and forcing new ideas and concepts to be played out. Welcome to the Anthropocene!

---

### Editor-in-Chief

Dr. Daniele Contini

Institute of Atmospheric Sciences and Climate (ISAC), National Research Council (CNR), Str. Prv. Lecce-Monteroni km 1.2, 73100 Lecce, Italy

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, Inspec, CAPlus / SciFinder, Astrophysics Data System, and other databases.

#### Journal Rank:

CiteScore - Q2 (Environmental Science (miscellaneous))
