

Special Issue

Climate Change and Blue Economy in Islands

Message from the Guest Editors

The theme of this ‘call for papers’ brings into focus a relatively new term within the framework of climate change: “blue economy”. In addition, this Special Issue of *Atmosphere* emphasizes how the adverse effects of this environmental crisis affect ‘downscaled’ territories, such as islands. After all, how else does one come up with ground-breaking papers other than by considering what is lacking in the existing literature? In this respect, it is worth recalling that the predominant flaw in the research dealing with climate change has been neglecting certain approaches that should be further addressed. For the details, please read at: [Climate_Economy](#) Principal Lecturer Gonzalo Diaz-Meneses

About the Journal

Message from the Editor-in-Chief

Continued developments in instrumentation and modeling have driven atmospheric science to become increasingly more complex with a deeper understanding of concepts, mechanisms, and interactions. This is the field that innovation built and it has led to a better appreciation for the complexity with atmosphere. Human life is intertwined in this complexity as we strive to better understand our atmosphere. Climate change is constantly stretching the limits of our thinking and forcing new ideas and concepts to be played out. Welcome to the Anthropocene!

Editor-in-Chief

Dr. Daniele Contini

Institute of Atmospheric Sciences and Climate (ISAC), National Research Council (CNR), Str. Prv. Lecce-Monteroni km 1.2, 73100 Lecce, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, Inspec, CAPlus / SciFinder, Astrophysics Data System, and other databases.

Journal Rank:

CiteScore - Q2 (Environmental Science (miscellaneous))
