

Special Issue

Public Health Impacts of Climate Change

Message from the Guest Editor

Climate change is already resulting in increased morbidity and mortality throughout the world. I invite you to consider submitting your research for publication in this Special Issue of *Atmosphere*, focusing on “Public Health Impacts of Climate Change”. The aim of this Special Issue is to communicate to the journal’s readership the current state of the science on climate change impacts on human health, with an emphasis on recommendations for interventions and solutions that will reduce climate impacts and protect public health. Relevant current issues of interest include health effects of wildfires, heatwaves, and other extreme weather events; impacts of climate change on global food production and quality; climate-related air pollution effects; and effects of ocean acidification and warming on sea level rise and food supply. Finally, research on how to pivot from data to coordinated climate action is welcome.

About the Journal

Message from the Editor-in-Chief

Continued developments in instrumentation and modeling have driven atmospheric science to become increasingly more complex with a deeper understanding of concepts, mechanisms, and interactions. This is the field that innovation built and it has led to a better appreciation for the complexity with atmosphere. Human life is intertwined in this complexity as we strive to better understand our atmosphere. Climate change is constantly stretching the limits of our thinking and forcing new ideas and concepts to be played out. Welcome to the Anthropocene!

Editor-in-Chief

Dr. Daniele Contini

Institute of Atmospheric Sciences and Climate (ISAC), National Research Council (CNR), Str. Prv. Lecce-Monteroni km 1.2, 73100 Lecce, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, Inspec, CAPlus / SciFinder, Astrophysics Data System, and other databases.

Journal Rank:

CiteScore - Q2 (Environmental Science (miscellaneous))
